

Ethernet Device Discoverer Mobile

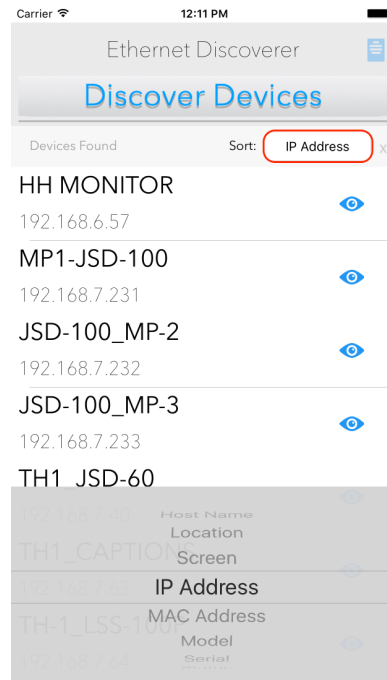

User Guide

+ Ethernet Discoverer Mobile for iOS and Android makes finding your USL products' device information easy. In addition, many USL devices are equipped with a **web interface** that can be accessed from within the app.

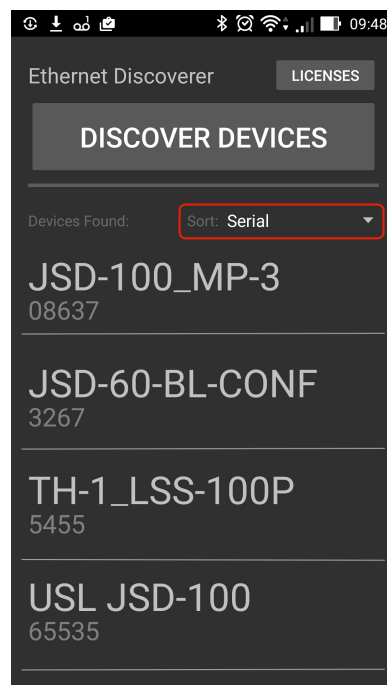

+ Before loading the app, ensure that you are **connected to the same network** on which your USL products are located.

+ Once the app has loaded, press "Discover Devices". This will broadcast a discovery message to your USL equipment. If communication has occurred, the app's view will populate with devices that have responded. The names shown are the NetBIOS host names in the equipment configuration.

+ The sort field can be adjusted to reorder the list of devices. (right images)

+ Tapping anywhere on an item in the list (upper images) will display more details about that device, including:

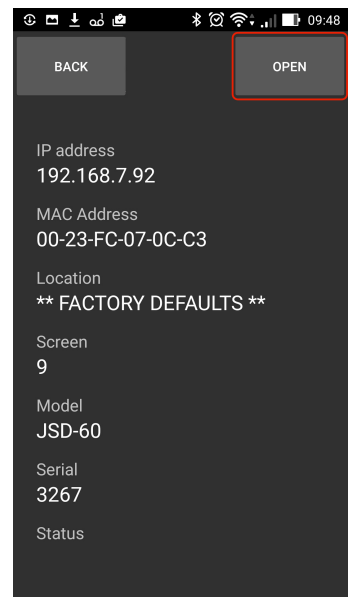

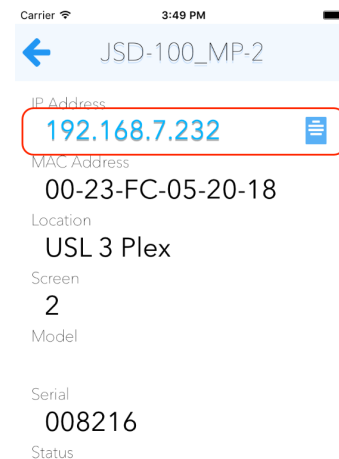

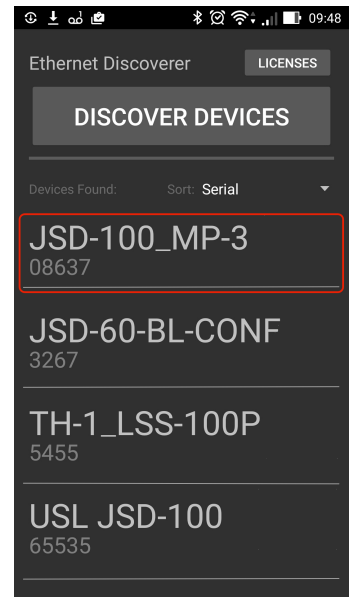

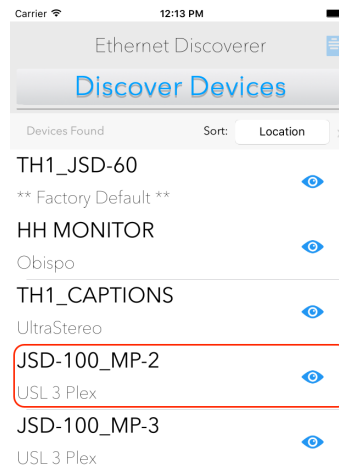

- + IP address
- + MAC address
- + Location
- + Screen
- + Model
- + Serial
- + For selected devices, a status message regarding its usage.

+ Within the next page, you are presented the option to open the focused device's web interface. To do this, tap the blue-highlighted IP address. (lower images)

+ To refresh the list, return to the home screen and press "Discover Devices".
